# Individual I's Emerge Above Identity of the Crowd

At every moment you choose yourself. But do you choose **your** self? Body and soul contain a thousand possibilities out of which you can build many I's. But in only one of them is there a congruence of the elector and the elected. Only one — which you will never find until you have excluded all those superficial and fleeting possibilities of being and doing with which you toy, out of curiosity or wonder or greed, and which hinder you from casting anchor in the experience of the mystery of life, and the consciousness of the talent entrusted to you which is your **I**.

Dag Hammarskjold  
**Markings**

Hurried students leave silent reminders of haste and activity.

"Treat others as ends, never as means." And myself as an end only in my capacity as a means: to shift the dividing line in my being between subject and object to a position where the subject, even if it is in me, is outside and above me — so that my **whole** being may become an instrument for that which is greater than **I**.

Dag Hammarskjold  
**Markings**

Symbols of progress become commonplace to students in a time of change.

Individual efforts become team goals as students strive for athletic victory.

For though the fig tree shall not blossom  
 Neither shall fruit be in the vines;  
 The labor of the olive shall fail,  
 And the fields yield no more meat;  
 The flock shall be cut off from the fold,  
 And there shall be no herd in the stalls:  
 Yet we will rejoice in the Lord  
 We will joy in the God of our salvation.  
 Jehovah, the Lord is our strength,  
 He maketh our feet like the feet of the hinds—  
 He will make us to walk on high places!

**In 1882 Edison had a great idea - - and it wasn't the electric light!**

The whole idea of investor-ownership of electric light and power companies began when Thomas A. Edison and a group of investors financed his first power plant more than 80 years ago.

Since then, investor-owned companies like ours have become an integral part of America's Free Enterprise system. That explains why today we have at our fingertips more electric power than any other country in the world.

And it's this same Free Enterprise system that puts at *your* fingertips greater opportunity, greater expectation for success than can be hoped for by any other young people in the world.

“ ”  
I

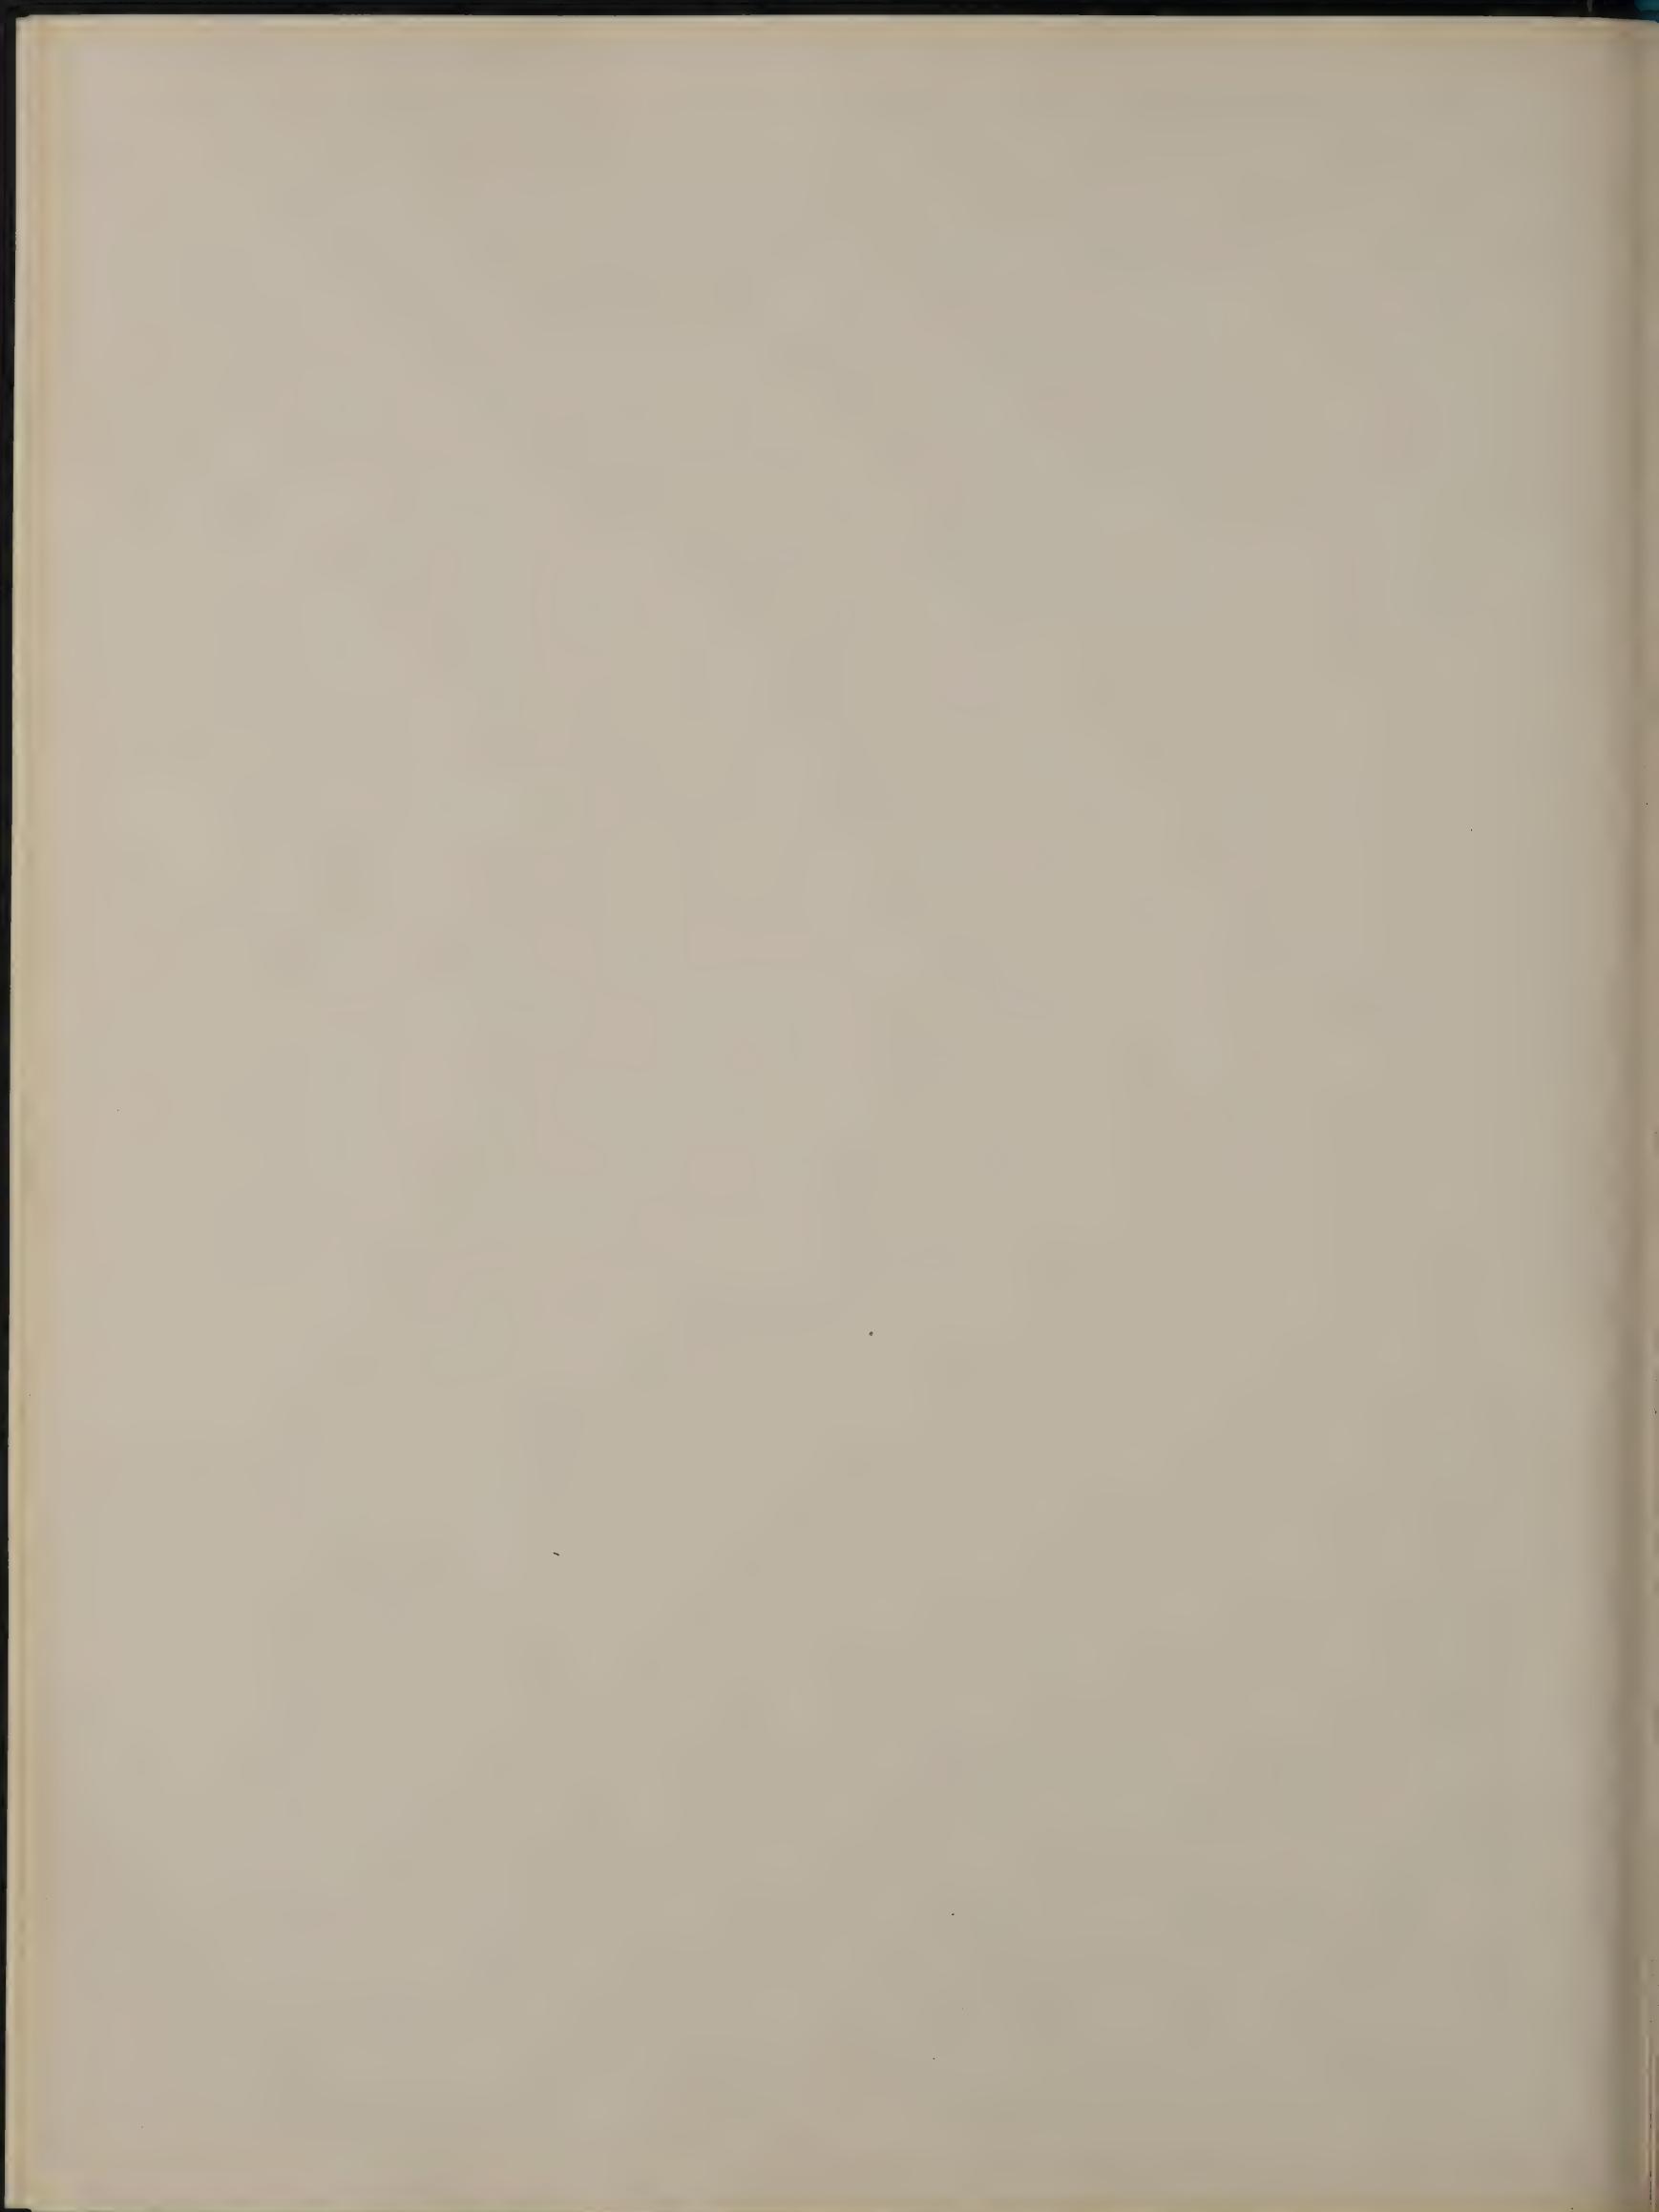

“Treat others as ends, never as means.”  
And myself as an end only in my capacity as  
a means: to shift the dividing line in my being  
between subject and object to a position  
where the subject, even if it is in me, is out-  
side and above me — so that my **whole**  
being may become an instrument for that  
which is greater than I.

outgoing girl  
I have ever seen.  
She is a real  
natural at sales  
and I am sure  
she will be  
a success in  
the business  
world. I  
would like  
to have  
her as a  
partner in  
my business  
but I am  
afraid it  
would be  
a waste of  
time. I  
will let you  
know if I  
find out  
anything  
more about  
her.
